For those of you interested in Esoteric Acupuncture

What is Esoteric Acupuncture? Most people think Esoteric Acupuncture is merely another form of acupuncture treatment. Practitioners may be interested in which acupuncture points to use and how to sequence the needling of those acupuncture sites. Those who are newly introduced to Esoteric Acupuncture may be impressed with the various geometric patterns. Esoteric Acupuncture defines a “way of life.”

Esoteric Acupuncture is not merely another form of acupuncture treatment. Esoteric Acupuncture defines a “way of life.” This way of life emphasizes the awakening and expansion of our spiritual center (not the same as religions). This

way of life includes the importance of understanding the vibrational frequencies of the foods and drinks we ingest. Everything we eat and drink shapes our multiple energy fields. It is important to only ingest foods of the cleanest and highest vibrations. Energy is transported through our hands, fingers and mind through the acupuncture needle into the client. Energy is a transporter of information. What information are you transmitting to your client?

The phrase Esoteric Acupuncture is broken up into three sections. Esoteric means something that is not readily known. There may be other meanings not understood by the casual reader or those not versed in esoteric teachings. Acupuncture comes from two words. “Acus” is a Latin word that means needle or obelisk. In esoteric teachings, obelisk can also mean a temple. Puncture means to pierce. Therefore, we are piercing your “temple” (your physical body) to activate or to reach something esoteric within. This esoteric “something” is the alignment, strengthening and refining your Heart Center. This Heart Center is the field that opens up infinite possibilities for your journey on planet Earth. We are interested in raising the vibrations of your Heart Center and to connect this center with all your denser frequency fields of consciousness including: your dense physical, etheric, astral and mental fields, plus accessing

and activating the buddhic, atmic, monadic and logoc fields of consciousness. It is possible for some of you to access solar, galactic and cosmic consciousness with repeated Esoteric Acupuncture treatments.

There was an inherent Time-lock in the release of Esoteric Acupuncture to Humanity. (Esoteric Acupuncture had its present genesis in 1995, but was not introduced to the public in book format until 1999.) That Time-lock was that the Consciousness of Humanity had to be vibrating at a higher frequency in order to be able to accept and understand the Ageless Wisdom in this New Format. It is important that you be able to quiet the mind to strengthen your Higher Heart Center. Academia is one of the most stubborn institutions for allowing changes to occur. Only those vibrating at a certain frequency will be drawn to Esoteric Acupuncture. Moving away from tradition is not something a society or group will easily accept.

Externalization of the Hierarchy
” A New Humanity is developing with a New and Finer Frequency Pulse for this planet. Are you flowing with the New Pulse or are you stagnant in the Old Frequencies? There will not be one external savior to assist with humanities karma. It will be a group body of dedicated individuals who will, as a group, raise the light quotient of the

Earth to assist in the uplifting of humanity. The New Humanity is what I call the Externalization of the Hierarchy. Recognize your own power You are the answer for a better planet. Those of you who are reading this are part of the Externalization of the Hierarchy.”

The emphasis of Esoteric Acupuncture is on spiritual awakening and centering all levels of the heart.

We must address the most fundamental levels, which I feel are the levels of the heart. The shen of the heart contain the pathways leading to various stages of awakening. The frequencies of healing are encompassed by the Field of Awakening. Of course with every acupuncture treatment the practitioner will also be working on the immune system of the physical body. Acupuncture treatments will address the ying qi level (deeper level) and the wei qi level (outer protective level) of the client receiving the Esoteric Acupuncture treatment. To address the most fundamental level of imbalance, we must go to the heart. The Chinese say that shen is stored in the heart. Shen can be translated as both mind and spirit. By aligning the various levels of the heart, we will be strengthening the spiritual

center which will assist in various levels of awakening.

If you decide to use any of the New Encoding Patterns or the Chakra Balancing Patterns, you must insert the acupuncture needle in the exact sequence that is given for each pattern. The correct sequencing of the acupuncture points will create a spin field that allows the recipient of the treatment to access higher frequencies for expanded consciousness. It is recommended that you remove the acupuncture needles in the exact inverse order of insertion.

Esoteric Acupuncture emphasizes Wellness versus merely addressing disease or physical imbalances.

Esoteric Acupuncture consists of both form and formlessness. The form aspect begins with triangles that are the genesis for the New Encoding Patterns and the Chakra Balancing Patterns.

Triangles are the signature for tetrahedrons. Tetrahedrons are the signature for consciousness.

“Everything that you have recognized in Universe as a pattern is re-cognited as the same pattern you have seen before. Because only the triangles persist as a constant pattern, any recognized patterns are inherently recognizable only by

virtue of their triangularly structure pattern integrities. Recognition is as dependent on triangulation as is original cognition.”
R. Buckminster Fuller

” The fact that the human body was exchanging information with a mutable field of quantum fluctuation suggested something profound about the world.....If living things boil down to charged particles interacting with a field sending out information, where did we end and the rest of the world begin? Where was consciousness—encased inside our body or out there in the field?”

Esoteric healing is part of Raja Yoga. They also work with triangle visualisations. The Yogi is in meditaton and treats his cliënts just like we do with Esoteric Acupuncture. A combination when both the cliënt and acupuncturist meditate during the treatment is part of Esoteric Acupuncture.
